PREFACE

In presenting this, the fifth, volume of our Register to the public, it is with thankfulness for the patronage received in the past and renewed assurance of the favorable reception of another volume in the history of a sheep for which there has been such a demand.

We feel that in no way can we better preserve the purity of the blood of our flocks, and thus serve the interests of those engaged in the breeding of a *pure* strain of sheep, than in the publication from time to time of volumes of a registry of flocks showing their history and pedigrees.

No change has been made in the form or plan of this book from those volumes already published, for the simple reason that experience and the examination of the volumes of other associations have failed to furnish us with anything superior to our own in convenience and simplicity.

We adhere to our already followed plan of critically examining every pedigree presented for record and allow neither erroneous nor spurious pedigrees to find a place in our volumes.

We republish the Constitution and By-Laws of the Association for the benefit of those who may not be already familiar with them; and we would urge all those who would transact business with us to acquaint themselves with these, and thus avoid trouble for themselves and the officers of the Association.

The rules which we have adopted, especially those governing the Secretary as to his duties in the admission of pedigrees and

the transfer of the same on the books of the Association, have been devised after careful deliberation and consideration for all concerned, and we beg of you not to ask or expect any favors inconsistent therewith.

We call special attention to Article II., Sections 1 and 2, governing the age of sheep when returned for registry. These have been slightly changed since the publication of Volume IV.

We would again remind you that it is impossible for us to furnish you with registry numbers of sheep recorded in any volume, previous to the date of closing the entries to or compiling the volume. This impossibility you recognize when you are aware of the fact that we arrange our flocks in each volume alphabetically as to names of owners, and at the same time number our pedigrees consecutively throughout the book. But our Secretary furnishes patrons with certified copies of pedigrees that can be used pending the publication of the volume.

We omit in this volume the general history of our sheep, as it has been given to the public in Volume I. But the pride which we have rightly had in the purity of our blood we have not lost. It has furnished the basis of the development of this popular breed of sheep in the past, and we anticipate your co-operation and approval in our efforts to preserve it for the future.

With an invitation to all those interested and desiring information concerning the work of our Association to freely write our officers, we present this, our Fifth Volume, to our friends and patrons.
